Quotes:

Attribute to Jack, Health QR user

"The great thing about Health QR is that I get a reminder when it is time for a refill of my prescription. It's very easy to order the refill online. Before Health QR, I was notorious for leaving it to the last minute. Then I'd run out of meds and have to scramble to get a prescription filled last minute. Now that never happens."

Attribute to Gary, Health QR user

"Thanks to Health QR my doctor was able to see a potential adverse reaction between two of my medications and immediately changed my dosage to reduce the chance of reaction."

Attribute to Patti Ryan, CEO, Health QR

"Since starting Health QR in 2012, my goal has been to provide people with access to their health information so they can make informed decisions about their care. Information is power and an informed patient is a powerful advocate. With the launch of Health QR we are taking a small first step by providing people access to their medication information."
